

MILAN PRIJIC

SENIOR SOFTWARE ENGINEER | IOS • MACOS • REACT • REACT NATIVE • FULL STACK • PRODUCT ENGINEERING

CONTACT

milan.prijic.92@gmail.com

mp-developer-portfolio.com

SELECTED PROJECTS

- **DevFlow** (StackOverflow like full stack web platform)
- **Ryde** (Uber like react native applicaiton)
- **Judgment Day** (3D singleplayer third person shooter game)

LANGUAGES

- Serbian (native)
- English (fluent)
- Spanish (beginner)

PROFILE

Senior Software Engineer with 10+ years of experience building and evolving native, web, cross-platform and game products. Senior-level expertise across iOS/macOS (Swift), React/TypeScript and React Native, with full-stack experience spanning client applications, REST APIs, backend services and databases. Strong product-engineering background: owned mobile product direction, wrote user stories and requirements, prioritized features and production issues, worked directly with enterprise clients, and led engineering teams. Additional hands-on experience with Unreal Engine and C++ game development, including single-player and multiplayer projects.

WORK EXPERIENCE

HTEC

Apr 2022 - Present

Senior React / iOS / MacOS Developer

- Developing and maintaining macOS, iOS and web applications using Swift, React, Typescript and related technologies.
- Progressed from a primarily technical role into a product-engineering role, planning features, prioritizing bugs and overseeing delivery of a pixel-perfect enterprise product.
- Led and supported a React development team during the migration from macOS to Web, coordinating implementation and maintaining product quality.
- Collaborate with enterprise stakeholders to understand requirements, resolve product issues and translate business needs into practical technical solutions.
- Make architecture and implementation decisions across native and web platforms, including non-standard requirements and complex technical problems.
- Contribute across the full delivery lifecycle, including development, code review, debugging, testing and production support

LearnUpon

Oct 2018 - Apr 2022

Senior iOS Developer | Mobile Product Lead

- Owned the technical direction and product evolution of the mobile applications, initially reinventing the iOS apps and later overseeing the Android team as well.
- Wrote user stories and requirements, planned features, prioritized the backlog, and decided how to address production bugs, client-reported issues and client-requested features.
- Worked directly with clients in frequent stakeholder meetings, managing requests, expectations, product direction and implementation timelines.

- Collaborated with Product, UX/Design, Android, Backend and other cross-functional teams to deliver and maintain a high-quality mobile product.
- Led code reviews, mentored developers and contributed to architecture, implementation, testing, release and ongoing maintenance of the iOS applications.
- Worked in Agile/Scrum environments and adapted to evolving team structures and product priorities.

Global IT Factory Aug 2017 - Aug 2018
Senior iOS Developer

- Developed, maintained and shipped iOS applications using Swift, Objective-C and related technologies.
- Delivered tailored mobile applications for Australian and Serbian companies across different industries.
- Collaborated with designers, product managers, Android developers and junior iOS developers throughout the product lifecycle.
- Worked closely with designers from planning and wireframing through feature implementation and refinement.
- Participated in code reviews and communicated directly with clients about product direction, feature prioritization and implementation timelines.
- Adapted to distributed teams and time-zone constraints, including direct client communication with Australian stakeholders.

CORE SKILLS

iOS / macOS: Swift, SwiftUI, UIKit, Objective-C, Combine, async/await, MVVM, VIPER, iOS architecture, Xcode, App Store deployments
Web: React, Typescript, JavaScript, Next.js, Vite, HTML, CSS, Tailwind CSS, NativeWind
React Native: React Native, Expo, mobile architecture, NativeWind, Google Maps, Stripe, Xcode, Android Studio, Zod, Zustand, Redux, push notificaitons, TanStack Query, Clerk
Full Stack: Next.js, Zod, Auth.js, Vapi, Vercel, REST APIs, PostgreSQL, MongoDB, Firebase, authentication, Stripe, API integration
Testing: Jest, XCTest, React Testing Library, Playwright, unit testing, integration testing, end-to-end testing, test automation
Engineering: Git, CI/CD, code review, software architecture, technical leadership, mentoring, debugging, performance optimization, production support
Product: Product discovery, roadmap input, backlog prioritization, user stories, requirements, acceptance criteria, feature planning, bug triage, stakeholder/client management, delivery planning
Gaming: Unreal Engine 5, C++, gameplay programming, single-player and multiplayer development, Lumen, Nanite, PCG, storytelling, level design, animations, gameplay mechanics
AI: Claude, GitHub Copilot, Gemini, AI-assisted software development

EDUCATION

Bachelor degree | Singidunum University 2011 - 2015
Information technology
GPA: 9.26 / 10
